Mr. David C. Frydenlund
Vice President and General Counsel
International Uranium Corporation (IUC)
Independence Plaza, Suite 950
1050 Seventeenth Street
Denver, CO 80265

SUBJECT: Authorization to Receive and Process Alternate Feed Material from the FMRI's Muskogee Facility
Revised Ground Water Quality Discharge Permit UGW370004
Revised 11e.(2) Materials License Number UT1900479 Amendment #2
Public Participation Summary, License Amendment No. 2

Dear Mr. Frydenlund:

We have resolved all public comments received during the public participation period. Therefore, the Utah Division of Radiation Control authorizes IUC to receive and process alternate feed material from Ponds 2 and 3 of the FMRI's Muskogee Facility located in Muskogee, Oklahoma.

Minor modifications have been incorporated into the Ground Water Quality Discharge Permit UGW370004 (Permit) and the 11e.(2) Materials License Number UT1900479 (License) Amendment #2 both effective June 13, 2006. Enclosed are copies of the modified Permit, License Amendment and a copy of the Public Participation Summary (PPS).

We request that you carefully read the final Permit and License revision to ensure future compliance with their provisions. If you have any questions regarding the final Permit, License or PPS please contact Dean Henderson at (801) 536-0046. Thank you for your cooperation in this matter.
